

FROM AI AMBITION TO BUSINESS IMPACT

Build smarter operations. Scale with AI.

Practical AI and agentic automation that reduces repetitive work, accelerates decisions and equips teams to operate with confidence.

AUTOMATE

High-volume workflows

Remove avoidable hand-offs and manual follow-up.

AUGMENT

Teams and decisions

Put trusted knowledge and next-best actions in the flow of work.

SCALE

Governed AI adoption

Move from a focused pilot to repeatable, measurable capability.

EXECUTIVE PROFILE

Technology leader turned AI transformation partner

Ashish brings 25 years of experience across technology, product, program leadership, analytics and AI. His corporate journey includes Microsoft, Adobe, Cisco, J.P. Morgan, Infosys, Flipkart/Walmart and ZS Associates.

CAPABILITIES

Focused solutions for the work that slows your business down

Engagements are designed around business outcomes—not technology for its own sake.

Workflow Automation

Automate approvals, follow-ups, reporting, data movement and recurring operational tasks.

AI Agents & Orchestration

Design goal-driven agents with tools, guardrails, human approvals and clear escalation paths.

Enterprise Knowledge Copilots

Turn policies, documents and internal know-how into reliable, source-grounded answers.

Customer & Revenue Operations

Support lead qualification, service workflows, account insights and next-best actions.

Responsible AI & Governance

Build privacy, access control, review points and measurement into every solution from day one.

AI Enablement & Training

Equip non-technical and leadership teams to use AI safely, productively and consistently.

HOW WE WORK

01

Discover

Map workflows, pain points and ROI.

02

Design

Prioritize use cases and controls.

03

Pilot

Build, test and measure quickly.

04

Scale

Integrate, train and improve.

CLIENT VALUE

• Lower operating friction

• Faster response cycles

• More consistent execution

• Stronger AI capability

START WITH ONE HIGH-VALUE WORKFLOW

Book an AI Automation Opportunity Scan

Identify the best pilot, expected value and practical path to implementation.
